SUMMARY

Full Stack Web Developer with a strong interest in engineering Javascript solutions. Quick to adapt to new environments, best practices, and skill sets. Eager to implement and expand proficiencies. Develops web apps with mobile-first responsive designs in mind. Addicted to algorithms and frustration.

TECHNICAL PROFICIENCIES

HTML5 & CSS3 (Flexbox & Grid), Sass, Less, Bootstrap 4, JavaScript (ES6, jQuery & jQueryUI), Wordpress, PHP, Perl, Firebase, MongoDB/Mongoose, MySQL/Sequelize, ORMs, REST APIs, Node, Express, Handlebars, React, Redux, server side rendering, Passport, Leaflet, Webpack, Parcel, CI/CD, Heroku, Git with Github & GitLab, Windows, Linux, MacOS

APPLICATIONS & PROJECTS

FitMonkeys

<https://obscure-wave-97311.herokuapp.com/>

<https://github.com/dmcneary/fit-monkeys>

Give users a way to track physical activities with interactive maps. Built authentication using only Passport and React. Collaborated with team & developed database controllers on the backend.

Google Books List

<https://google-books-list.herokuapp.com/>

<https://github.com/dmcneary/google-books-list>

Search for books by keyword and store them to a list to be referenced later. Full stack MERN app using the Google Books API.

AP News Scraper

<https://ap-news-scraper.herokuapp.com/>

<https://github.com/dmcneary/news-scraper>

Full-stack app using server-side templates. Scrapes with AJAX & JSON to read new articles from the AP newswire using Cheerio.
